

2023 CFPI CLASS OPPORTUNITIES

TOGETHER TOWARDS TOMORROW CREATING NEW TRADITIONS

CFPI Schedule of Events

We are so pleased to welcome you to CFPI 2023!

This will be our first year at the beautiful Santa Barbara Hilton Beachfront Resort, and we have quite a conference planned for you.

There are quite a few changes from our time in Buellton, and we are pleased to be able to share some of those things with you now! First is the obvious, which is the new location. Surrounded by palm trees, and right on the Pacific Ocean, there are views of Channel Island National Park from the hotel lobby and restaurant.

While the setting is wonderful, the class list this year is more robust than ever. We have nine classes each day, four more than ever before. We are continuing with our tracks, Community Risk Reduction Track, Management/Leadership Track, Technical Track, and WUI. We have a number of CFSTES courses including fire inspector and community risk reduction. We also have FSTEP courses, and the diverse course lineup you have come to expect.

Lastly, the vendor day has been expanded to two days, and will have more vendors than ever before.

We look forward to seeing you in Santa Barbara to help us make new memories at our new location!

CFPI Schedule Overview

Monday, February 13th

- California and the EPA Have Embraced A2Ls: Are You Ready?
- Statutes and Regulations - Multi-day Course
- Human Behavior and the Means of Egress
- What is the Planning Process and Why is it so Important for Fire Departments to be Involved?
- Community Risk Reduction: Action Steps for CRR Teams
- Plans Examiner 1A
- Home Ignition Zone/Defensible Space Inspector Curriculum - Multi-day Course
- Fire Inspector 2A - Multi-day Course
- Inspection of OSHPD 3 Clinics in your Jurisdiction and STD 850 Processing of Licensed Clinics
- Fire Alarm Compliance
- Fire Prevention Officers and CFPI Annual Business Meeting
- Annual Awards Reception

Tuesday, February 14th

- Everything Battery
- Statutes and Regulations (cont.) - Multi-day Course
- Legal Aspects of Code Enforcement
- Code Development: How to Participate and Make a Difference
- Building Interactive Activities that Increase Engagement and Knowledge Retention
- Fire and Life Safety Educator (FLSE 2) - Multi-day Course
- Home Ignition Zone/Defensible Space Inspector Curriculum (cont.) - Multi-day Course
- Fire Inspector 2A (cont.) - Multi-day Course
- I-joists and Firefighter Safety / Construction Fire Safety Best Practices
- NFPA 14 Standpipe Pressure Reducing Valve Design, Acceptance Testing and Standpipe ITM
- Consumer Product Safety Commission (CPSC) - Available Programs to FPO's
- Fixed Foam Fire Protection Systems and Transition Considerations
- Vendor Day - Day 1

Wednesday, February 15th

- Office of the State Fire Marshal Forum
- Sprinkler Forum
- Alarm Forum
- National Fire Academy Forum
- Fire Inspector 2B - Multi-day Course
- Fire and Life Safety Educator (FLSE 2) - Multi-day Course
- Vendor Day - Day 2

Questions? - registration@cfpi.org

CFPI Schedule Overview (con't.)

Thursday, February 16th

- What are the Significant Changes to the 2022 California Fire Code and Why
- Residential Licensed Facilities
- NFPA 770 Installation Hybrid-Fire Extinguishing Systems Design and ITM
- ERCES Overview and Plan Review Considerations
- The ISAAC Foundation
- Fire and Life Safety Educator (FLSE 2) - Multi-day Course
- Home Ignition Zone/Defensible Space Inspector Curriculum (cont.) - Multi-day Course
- Fire Inspector 2B (cont.) - Multi-day Course
- Fire Alarm Plan Review
- Hazardous Materials for the Fire Inspector

Friday, February 17th

- ITM Fire Pumps
- You Want to Build What?!
- Safe Practices for Dust Hazard Processes
- Fire Door Systems, A Guide to Code Compliance
- Car Stackers - Hazards and Best Practices
- Fire and Life Safety Educator (FLSE 2) - Multi-day Course
- Community Wildfire Risk Reduction
- Fire Inspector 2B (cont.) - Multi-day Course
- Implementing an Effective Hazardous Materials Permitting & Inspection Program
- Overview of Private Underground Fire Mains and Appurtenances Plan Review and Inspection

Daily Activities and Inclusions

Morning refreshments, lunch and afternoon refreshments will be offered Monday - Thursday. Friday morning refreshments will also be offered. Wi-Fi will be available in the hotel and classrooms. Please note the various other committee meetings and activities noted in this schedule that do not need a registration in the registration portal, e.g., California Fire Sprinkler Coalition update.

ICC CEUs are provided for each class attended.

Business casual is appropriate should your department not require you to be in uniform.

As always, if you have any questions, please reach out to us at registration@cfpi.org

Monday Morning, February 13th

Human Behavior and the Means of Egress Cheryl Domnitch

8am-12pm

The class addresses human behavior in fire and the relationship to the means of egress. Case studies are utilized for discussion and an understanding of lessons learned. The lessons learned are applied to the exiting code provisions development process historically to present day. The class is not a code-based class, but rather intended to assist fire plans examiners and fire inspectors in gaining knowledge regarding human behavior and code development to improve skills in decision making and code application.

Monday Afternoon, February 13th

What is the Planning Process and Why is it so Important for Fire Departments to be Involved? Adria Reinertson and Traci Williams

1pm-5pm

This class will focus on the importance of building communities with consideration to overall community risk reduction. The course will cover what needs to be evaluated during the planning phase of development to include water and access, wildland urban interface, infrastructure, and potential exposures. The class will also discuss the importance of looking beyond fire prevention and code requirements, evaluating the availability of resources and potential needs related to development projects.

Monday All Day, February 13th

California and the EPA have Embraced A2Ls: Are You Ready? Robert Davidson, Sean DeCrane and Michael O'Brian

8am-5pm

This program will review changes to codes and standards that have occurred to provide for smooth implementation of the use of A2L flammable refrigerants to allow for a smooth transition in accordance with deadlines set by the EPA and various states. The course will cover the properties of the A2Ls and include laboratory test results of leaks/fires involving A2Ls. Electronic Handouts.

Documents to be covered ASHRAE 90.1, ASHRAE 15 and 34, IBC, IFC, UMC and anything refrigerant/A2L.

Statues and Regulations Darin Workman, Sandy Margullis and David Nye

8am-5pm

Multi-day Course

This course provides hands-on training. Topics include codes, standards and local amendments, site-plan review, building construction and characteristics, fire protection equipment, multi-family occupancies, commercial buildings, care facilities, drinking/dining facilities, shopping malls, and high-rise buildings.

There is an additional \$75 fee for this course.

Fire Alarm Compliance Todd Laeger

8am-5pm

This course is designed to provide the inspector with the skills and abilities for ensuring fire alarm compliance.

Home Ignition Zone/Defensible Space Inspector Curriculum Matthew Samson and Dave Winnacker

8am-5pm

Multi-day Course

This class is designed for anyone preparing to become a home Ignition Zone / Defensible Space Inspector or has recently been assigned the duties for their jurisdiction. This course provides the skills and knowledge needed to perform in the role of a Home Ignition Zone / Defensible Space Inspector (HIZ/DSI) including roles and responsibilities, wildfire in the natural and built environment, codes and regulations, defensible space, home hardening, and the inspection processes.

Monday All Day (cont.), February 13th

Plans Examiner 1A Robert Marshall

8am-5pm
Multi-day course

A CFSTES certification course, this course provides the knowledge and skills that prepare a plan examiner to carry out administrative responsibilities associated with plan review services and evaluate plans for new buildings in accordance with applicable codes and standards and jurisdictional policies and procedures. There is an additional \$140 State Certification fee for this course.

CSFM Fire Inspector 2A: Fire Prevention Administration Justin Beal

8am-5pm
Multi-day Course

Fire Prevention Administration: A CFSTES Certification course, this class provides students with a basic knowledge of the administrative requirements related to the roles and responsibilities of a Fire Inspector 2 including processing permit and plan review applications, enforcing permit regulations, investigating complex complaints, recommending modifications to codes and standards, recommending policies and procedures for inspection services, generating written appeals correspondence, initiating legal action, evaluating inspection reports, and proposing technical reference material acquisition. There is an additional \$140 State Certification fee for this course.

Community Risk Reduction: Action Steps for CRR Teams Karen Berard-Reed and Chelsea Rubadou

8am-5pm

Join the NFPA Community Risk Reduction (CRR) team for an 8 hour workshop designed to assist CRR professionals in developing data-driven CRR plans. During this interactive session, the NFPA CRR team will guide participants through the CRA process outlined in NFPA 1300 Standard on Community Risk Assessment and Community Risk Reduction Plan Development. Participants will dig into the "HOW" and "WHY" of the CRA process, and have an opportunity to test drive, CRAIG 1300 the NFPA CRA Insight Generator. Additionally, this workshop will provide valuable information to guide CRR teams working to apply CRA data to the CRR plan development process. The workshop will provide content for professionals who are both new to CRR and those who are already knee deep in the process. Each participant will leave the session with three customized critical actions to move local CRR efforts forward, a strong understanding of the range of data that support the CRA, and many new CRR colleagues to lean on for support even after you return home.

Monday All Day (cont.), February 13th

Plan Review and Inspection of OSHPD 3 Clinics in your Jurisdiction and STD 850 Processing of Licensed Clinics Nanci Timmins and Crystal Sujeski

8am-5pm

Local jurisdictions are experiencing a swing in the number of clinics and ambulatory surgical centers being constructed outside of hospital settings. Local fire departments are being tasked with plan reviewing these clinics and ambulatory surgical centers within their jurisdiction. This class is intended to provide the plan reviewer and the inspector detailed knowledge and code review specific to clinics and ambulatory surgical centers built as OSHPD3 occupancies. Additionally, these facilities are required to be licensed by the CA Department of Public Health Certification & Licensing so STD 850s are requested from local fire jurisdictions to process.

Fire Prevention Officers and CFPI Annual Business Meeting

11:30am-1:30pm
During Lunch

This inaugural joint Annual Business meeting of the Northern and Southern California Fire Prevention Officers and CFPI will feature updates from the associations' leadership and report out on finances, installation of newly elected Fire Prevention officers, voting on changes to the FPO and CFPI Bylaws, and voting for the CFPI Board of Directors.

Annual Awards Reception - Monday Evening

Starts at 6pm

Attend the first Annual Awards Reception which will be a night to remember. We will gather together to celebrate the shining stars in the fire prevention profession. The Awards Reception will recognize the achievements and contributions of our amazing and talented award recipients and will inspire others.

Hors d'oeuvres will be served; no-host bar. Casual Cocktail Attire.

Please note: each registered conference attendee will receive one ticket. Additional tickets can be purchased.

This event replaces the traditional Thursday night Awards Banquet.

Tuesday Morning, February 14th

I-joists and Firefighter Safety/Construction Fire Safety Best Practices Raymond O'Brocki

8am-12pm

This program identifies the features and benefits of wood I-joists which explains the prevalence in the market. The program also explains UL fire testing that identified the fire performance failures or light frame floor assemblies which led to changes in the floor protection requirements of the International Residential Code® (IRC). Those IRC protection requirements are explained. Alternate methods of protecting I-joist assemblies are explained along with the details of acceptable installation of specific assemblies. This program will discuss changes in housing stock and interior contents, and changes in building materials that have posed a challenge for firefighters.

Legal Aspects of Code Enforcement Randy Roxson, Esq.

8am-12pm

This course is four hours or less and is designed to cover most general legal topics that a fire inspector of a state, local, or fire protection district in California may confront during their respective course of duties. This course is not intended to supplant the State Fire Marshal's Statute & Regulations Course but to cover more of the legal aspects that may arise that may affect the fire inspector. The course is designed to provide the fire inspector with the legal framework of his or her position and that relationship with other public entities. It also touches on immunities to liability and addresses the legal responsibilities related to areas other than the fire inspection. The course will specifically address legal authority, jurisdiction, immunities, public records, writs, code related appeals, and the legal aspects of conducting a public meeting.

Code Development: How to Participate and Make a Difference Karl Fippinger and Susan Dowty

8am-12pm

Have you ever wanted to change the code, but didn't know where to start? This class will provide you with the knowledge and practice to overcome any hesitation to get involved plus provide the motivation to participate and make a difference. Information will be shared on 1) the new code development process for the 2027 I-Codes, 2) the many different ways to participate 3) code change success stories, and 4) "do's and don'ts" with examples. Time will be spent actively participating in exercises so as to fully understand and experience the code development process and steps involved in taking a code change from start to finish. These exercises will bring the code development process to life and inspire a rewarding journey of involvement.

Tuesday Afternoon, February 14th

Change Agent: Transitioning AFFF to SFFF in the State of California Joshua Overholt

1pm-5pm

This class will cover the basics of fixed foam fire protection systems and their applications. Specifically, during this program we'll discuss the different types of foam systems as well as the components associated with the operations of various system types. This course will also explore the variety of discharge devices and their respective applications across various special hazard protection areas. With the recent change to synthetic fluorine free foam (SFFF) concentrates, the program will close with a discussion on the transition process from legacy foam concentrates such as AFFF to fluorine free foams.

Consumer Products Safety Commission (CPSC) - Available Programs to FPOs Scott Ayers

1pm-5pm

Learn all about the programs and accreditations of the CPSC.

NFPA 14 Standpipe Pressure Reducing Valve Design, Acceptance Testing and Standpipe ITM Johnathan Carl

1pm-5pm

This session will examine the requirements for designing standpipe systems with master pressure reducing devices, pressure reducing devices that feed NFPA 13 zone systems and pressure reducing hose valve designs. We will discuss acceptance testing and commissioning of these devices in accordance with NFPA 25 and NFPA 14. The presenter will discuss key equipment installed on standpipe systems and how it should be installed and tested. There will be a discussion on evaluating design approaches and test results and how to classify conditions that could impact the performance of the standpipe system. There will also be a discussion on potential changes to NFPA 25 and NFPA 14 that could impact future standpipe testing.

Life Safety and Fire Investigations Committee Meeting - CSFA

5pm-6pm

Meeting of the California State Firefighters Association Life Safety and Fire Investigations Committee. Open to all interested in attending.

Tuesday All Day, February 14th

Everything Battery

8am-5pm

Robert Davidson, Kara Gerczynski and Sean DeCrane

This program will cover a wide range of battery topics in this fast-changing field of EV charging, manufacturing, storage (awaiting use), collection (used/damaged), in use (ESS, Personal Mobility Devices). The program will cover hazards, new code solutions for protection levels and response considerations. Electronic Handouts. Documents to be covered: IFC, IBC, NEC, UL 9440, UL 9540A

Building Interactive Activities that Increase Engagement and Knowledge Retention

Brene Duggins

8am-5pm

Are you looking for activities that get your audience engaged? Not sure where to start? Or how to use them effectively? Join 2022 NFPA Educator of the Year, Brene Duggins, as she demonstrates a variety of Interactive Tools and Activities LIVE! She will then walk you through how to build them for your own department and demonstrate how these tools can be used to gather data on your audience and the effectiveness of your programs. Participants will walk away with a toolbox of activities and ideas to take back to their departments.

Statues and Regulations (cont.)

8am-5pm

Fire and Life Safety Educator (cont.)

8am-5pm

Home Ignition Zone/Defensible Space Inspector Curriculum (cont.)

8am-5pm

CSFM Fire Inspector 2A (cont.)

8am-5pm

Vendor Day

4pm-7pm

Join our partner organizations for the afternoon and learn all about what they have to offer you and your department. Network with other fire professionals and industry leaders. You won't want to miss the raffle. Must be present to win.

Wednesday, February 15th

State Fire Marshal Panel/Forum

8am-10am & 10am-12pm

This session will be an update on current topics, led by the CSFM for the first half. The second half will be a Q&A session.

Fire Alarm Panel/Forum

8am-10am & 10am-12pm

This session will be an update on current topics, led by CAFAA for the first half. The second half will be a Q&A session.

National Fire Academy/Forum

8am-10am & 10am-12pm

This session will be an update on current topics, led by the National Fire Academy for the first half. The second half will be a Q&A session.

Fire Sprinkler Panel/Forum

8am-10am & 10am-12pm

This session will be an update on current topics, led by Sprinkler Fitters 483 and others for the first half. The second half will be a Q&A session.

CSFM Fire Inspector 2B Justin Beal

8am-5pm
Multi-day Course

Fire and Life Safety Requirements: A CFSTES certification course, this class provides students with a basic knowledge of fire and life safety requirements related to the roles and responsibilities of a Fire Inspector 2 including occupancy classification, egress elements, emergency plans and procedures, occupant loads, building construction and fire growth potential. There is an additional \$140 State Certification fee for this course.

Fire and Life Safety Educator (cont.)

8am-5pm

Vendor Day

1pm-5pm

Join our partner organizations for the afternoon and learn all about what they have to offer you and your department. Network with other fire professionals and industry leaders. You won't want to miss the raffle. Must be present to win.

Wednesday, February 15th (cont.)

California Fire Sprinkler Coalition Update

5:30pm-6:30pm

This is an open meeting of the California Fire Sprinkler Coalition, sponsored by the National Fire Protection Association. The membership meets regularly throughout the year, and this is the annual in-person meeting. The purpose is to bring stakeholders and fire prevention officers together to discuss issues and related information affecting fire sprinklers in California and throughout the nation. Topics will include California sprinkler legislation and stakeholder reports.

Thursday Morning, February 16th

NFPA 770 Installation Hybrid-Fire Extinguishing Systems Design and ITM Johnathon Carl

8am-12pm

This session will examine the requirements for designing standpipe system with master pressure reducing devices, pressure reducing devices that feed NFPA 13 zone systems and pressure reducing hose valve designs. We will discuss acceptance testing and commissioning of these devices in accordance with NFPA 25 and NFPA 14. The presenter will discuss key equipment installed on standpipe systems and how it should be installed and tested. There will be a discussion on evaluating design approaches and test results and how to classify conditions that could impact the performance of the standpipe system. There will also be a discussion on potential changes to NFPA 25 and NFPA 14 that could impact future standpipe testing.

Thursday Afternoon, February 16th

Hazardous Materials for the Fire Inspector Lynne Kilpatrick

1pm-5pm

This course is intended to provide a basic understanding of the hazardous materials provisions in the 2021 International Fire Code. If you are new to inspections or plan review, or just want to further your knowledge in enforcing the IFC as it pertains to hazardous materials, this class is for you! Come along as we review Chapters 50 through 67 of the IFC and apply the requirements for buildings that utilize hazardous materials and require coordination between the fire and building codes.

Thursday All Day, February 16th

What are the Significant Changes to the 2022 California Fire Code and Why Kevin Reinertson and Kevin Scott 8am-5pm

This class will focus on the Significant Changes to the 2022 California Fire Code (CFC), that also includes the Significant Changes to the 2021 International Fire Code (IFC) the base model code used for the 2022 CFC. The class will familiarize fire officials, building officials, plans examiners, fire inspectors, design professionals and others with many of the important changes. This is to assist code users in identifying the specific code changes that have occurred and, more important, in understanding the reasons behind the changes.

ERCES Overview and Plan Review Considerations Gareth Harris and Chris Creamer 8am-5pm

Learn the basics of Emergency Responder Communication Enhancement Systems (ERCES) as well as how to plan review these critical systems.

Fire Alarm Plan Review Curtis Streeter 8am-5pm

This course is designed to familiarize the attendee with the requirements of the California Fire Code (CFC) and other standards as they pertain to fire alarm shop drawings and other project documents required to be submitted by contractors, engineers, or other qualified design professionals. Specific federal or local jurisdictional requirements are not intended to be covered but would be welcome examples for discussion during the course presentation.

Thursday All Day, February 16th (cont.)

Residential Licensed Facilities

8am-5pm

Ernie Paez, Patricia Rock and Rocque Yballa

This course provides overview of residential licensed facilities including residential care for both large and small facilities as well as large and small family day care facilities. Focus topics will include relevant statutes, licensing requirements, plan review, inspections, as well as working with Social Services and your local planning/building departments.

The ISAAC Foundation

8am-5pm

Holly Goodman and John Goodman

This class will give the Fire and Life Safety Educator the tools to reach special individuals in our community. It will discuss safer encounters between first responders and those with special needs. There are discussions of developmentally appropriate education, positive experiences, and plenty of practice on how to deliver the messages. You will learn the ISAAC foundations adaptive fire safety education. This education will give you the ability to take home the opportunity to interact with youth that have disabilities, of all abilities, to learn critical lifesaving, developmentally appropriate skills and interactions so that they are prepared in the event of an emergency.

Fire and Life Safety Educator (cont.)

8am-5pm

Home Ignition Zone/Defensible Space Inspector Curriculum (cont.)

8am-5pm

CSFM Fire Inspector 2B (cont.)

8am-5pm

Friday, February 17th

ITM Fire Pumps Joe McElvaney

8am-12pm

This class will provide an overview of some of the common items that one should see in the ITM of Fire Pumps, standpipes and PRV's and common issues that you will find during your review of ITM paperwork.

Safe Practices for Dust Hazard Processes Ray Bizal

8am-12pm

In your jurisdiction, do you have a bakery, food processing plant, metal shop, woodworking shop or additive manufacturing? If so, you might have a dust explosion hazard. We will take a look at the background of the dust hazard problem, fundamental behavior of dusts and NFPA standards available for different dust types and industries.

You Want to Build What?! James Frater

8am-12pm

Development challenges and unique business needs are becoming more and more common in today's-built environment. How can the California Fire Code (CFC) & California Building Code (CBC) support solutions when their prescriptive provisions hinder them? This course will review provisions within the CFC/CBC that give the designer the ability to propose non-prescriptive solutions and the Fire Marshal/Building Official the ability to approve them. Learn options and evaluation strategies through discussion of case studies pulled from a 27-year career in fire prevention with stints in fire protection engineering, code consulting, Building & Safety and Fire Departments including serving as a Fire Marshal for approximately 12 years. This course is beneficial for permit technicians, inspectors, plan reviewers, assistant/deputy fire marshals, building officials and fire marshals.

Implementing an Effective Hazardous Materials Permitting and Inspection Program Lynne Kilpatrick

8am-12pm

This course is designed to communicate tips for implementing an effective hazardous materials permit and inspection program - even with limited staff, limited resources, and limited technical knowledge.

Friday, February 17th (cont.)

Fire Door Systems, A Guide to Code Compliance David Dodge

8am-12pm

This course is designed to help you understand the fundamental guideline principles that govern the provisions of Chapters 3 thru 10 and 30 in the current International Building Code. A thorough review of these provisions allows the architectural community as well as code enforcement personnel to better approach the challenges inherent to design, construction and fire & life safety compliance.

Community Wildfire Risk Reduction Frank Bigelow, Daniel Berlant and Jim McDougald

8am-12pm

Today's wildfire environment has changed, allowing for longer fire seasons with more intense and destructive wildfires. Climate change, land use, fire suppression, population growth, and other factors have contributed to putting millions of homes and hundreds of communities at extreme risk of wildfire. During this presentation, the latest in wildfire science and research, statutes, and codes, and best management practices for living and building in wildfire-prone areas will be discussed. The 2019 California Building Code: Chapter 7A requirements for exterior protection of structures and the 2019 California Fire Code: Chapter 49 defensible space requirements intended to mitigate wildfire hazards will be discussed. Fire, building, and enforcement professionals interested in gaining knowledge on identifying your community's wildfire hazards, risks, and mitigation strategies are encouraged to attend.

Car Stackers – Hazards and Best Practices - Hans Henneberque and Jon Corbett

8am-12pm

This class will provide an overview of the issues with car stackers, modern vehicle fire fuel loads, and providing suppression in a fire event. We will also cover related codes and standards, and discuss performance-based considerations. The presentation will cover real-world historic conditions and current issues, then end with a Q and A session.

Friday, February 17th (cont.)

Overview of Private Underground Fire Mains and Appurtenances Plan Review and Inspection Ian Hardage

8am-12pm

Are you wanting to better understand your role in the approval and acceptance process of private underground fire main systems. Or are you looking for some best practices to enhance your existing plan review and inspection processes? Join us for an interactive workshop where we will discuss the installation of private underground fire main systems. In this seminar, attendees will receive a review of private underground fire main systems. Emphasis will be on NFPA 24 2019 & 2022 editions, and a quick review and comparison of NFPA 13 water supply requirements. We will also highlight the State Fire Marshal amendments found in CFC. During a short 4-hour adventure into the world of private underground fire main systems, attendees will have an opportunity to discuss best practices and shared experiences, to help avoid the common pitfalls of the design and installation of these critical components.

CSFM Fire Inspector 2B (cont.)

8am-12pm
